

Polymer Overbraided Hose Assemblies

Description

PTFE lined / Stainless Steel Lined Flexible Hose Assemblies. Particularly suited to the transfer of corrosive chemicals, food products, hydraulic oil and steam. Offers excellent flexibility and resistance to chemicals and solvents. Polymer overbraiding enables features such as colour coding and high visibility.

Construction

Internal - 321 or 316 Convoluted Stainless Steel, Convoluted or Smoothbore PTFE
External - Coloured Polymer Overbraid

Temperature

Metallic Lined -200°C to +700°C
PTFE Lined -60°C to +260°C

Assemblies
